Crafting Excellence in Every Ingredient.

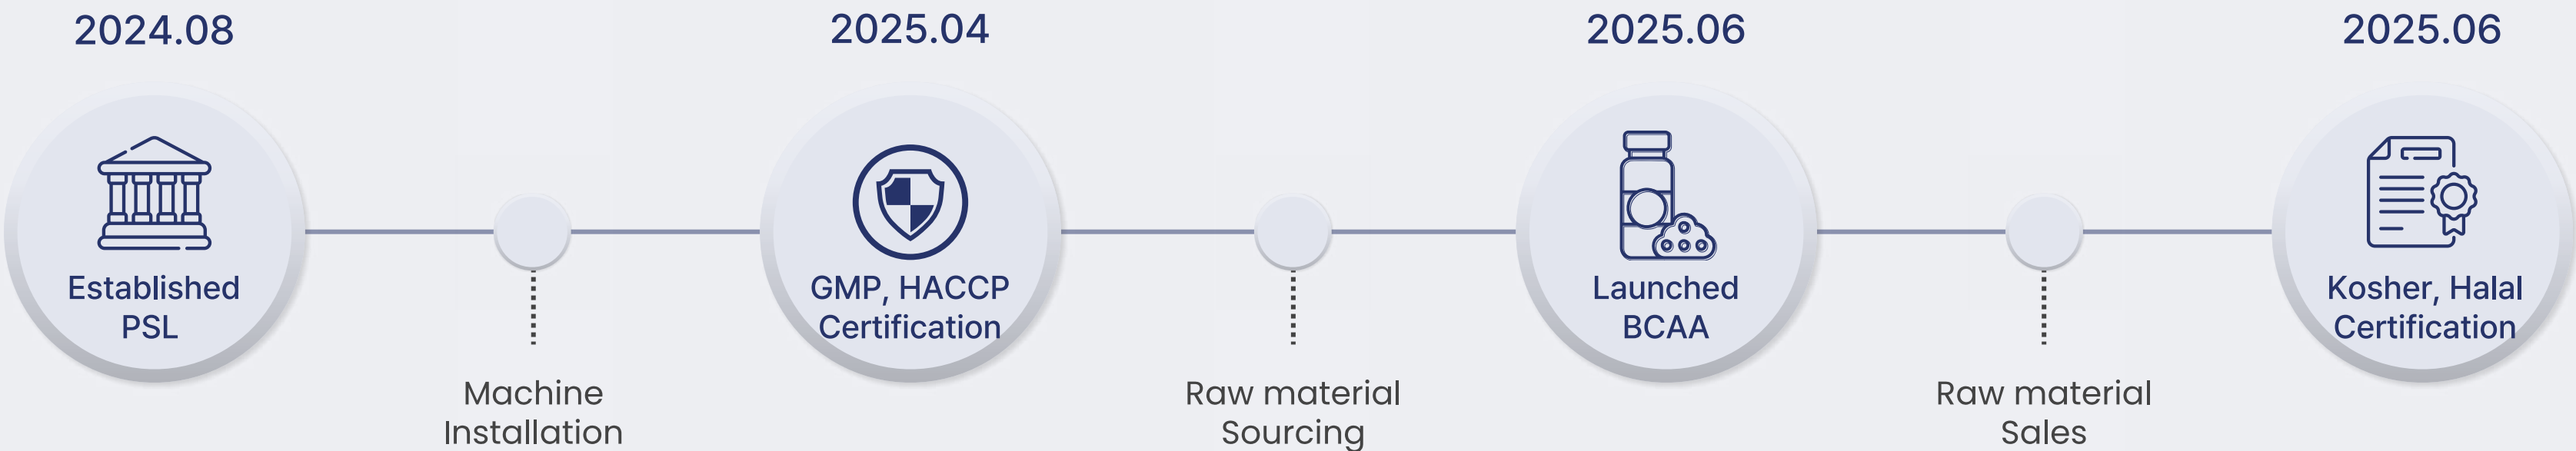

PSL (Pharma Science Leaders) specializes in developing and distributing the highest quality, innovative ingredients worldwide. With advanced premix manufacturing facilities in Gimhae, PSL is committed to excellence, scientific innovation, and global leadership in ingredient solutions.

Name	Pharma Science Leaders
Established	2024.08
Location	17, Saman-ro, Gimhae-si, Gyeongsangnam-do, Republic of Korea

CEO	John, Park
Factory area	1,000m ²
The field of business	Raw material distribution and manufacturing

MILESTONES

PSL, established in 2024, leads innovation in nutritional ingredients to advance health supplements and help customers live healthier, more vibrant lives.

2024.08 Located conveniently to the upcoming new trade port and multiple airports

2025.04 Using our extensive network and experience, we sourced materials globally

2025.06 Certified Kosher
Certified HALAL

2025.02 Completion of our first phase in our manufacturing plant installing high quality and volume mixers

2025.04 Certified GMP
Certified HACCP

2025.08 Strategic raw material business progress
global raw material sourcing

PHILOSOPHY & VALUES

PSL is committed to creating a healthier future through premium nutritional ingredients and science-driven innovation. With integrity and global partnerships at our core, we lead the way in setting new standards for health and wellbeing.

MISSION

Our promise for a healthier, brighter future.

VISION

To lead global innovation in nutritional ingredients for a healthier world.

CORE VALUE

Quality

Delivering only the finest ingredients with a steadfast commitment to safety, purity, and sustainability.

Innovation

Continuously advancing with science-driven solutions that shape the future of health and nutrition.

Customer Trust

Fostering long-term global partnerships through transparency, reliability, and shared growth.

Manufacturing

Our Integrated Value Chain

R&D

Continuous research and development of premium nutritional ingredients
Exploration of new functional materials through a team of scientific experts

Sourcing

Strategic global sourcing of high-quality raw materials
Building trusted supply chains with verified international partners

Sales

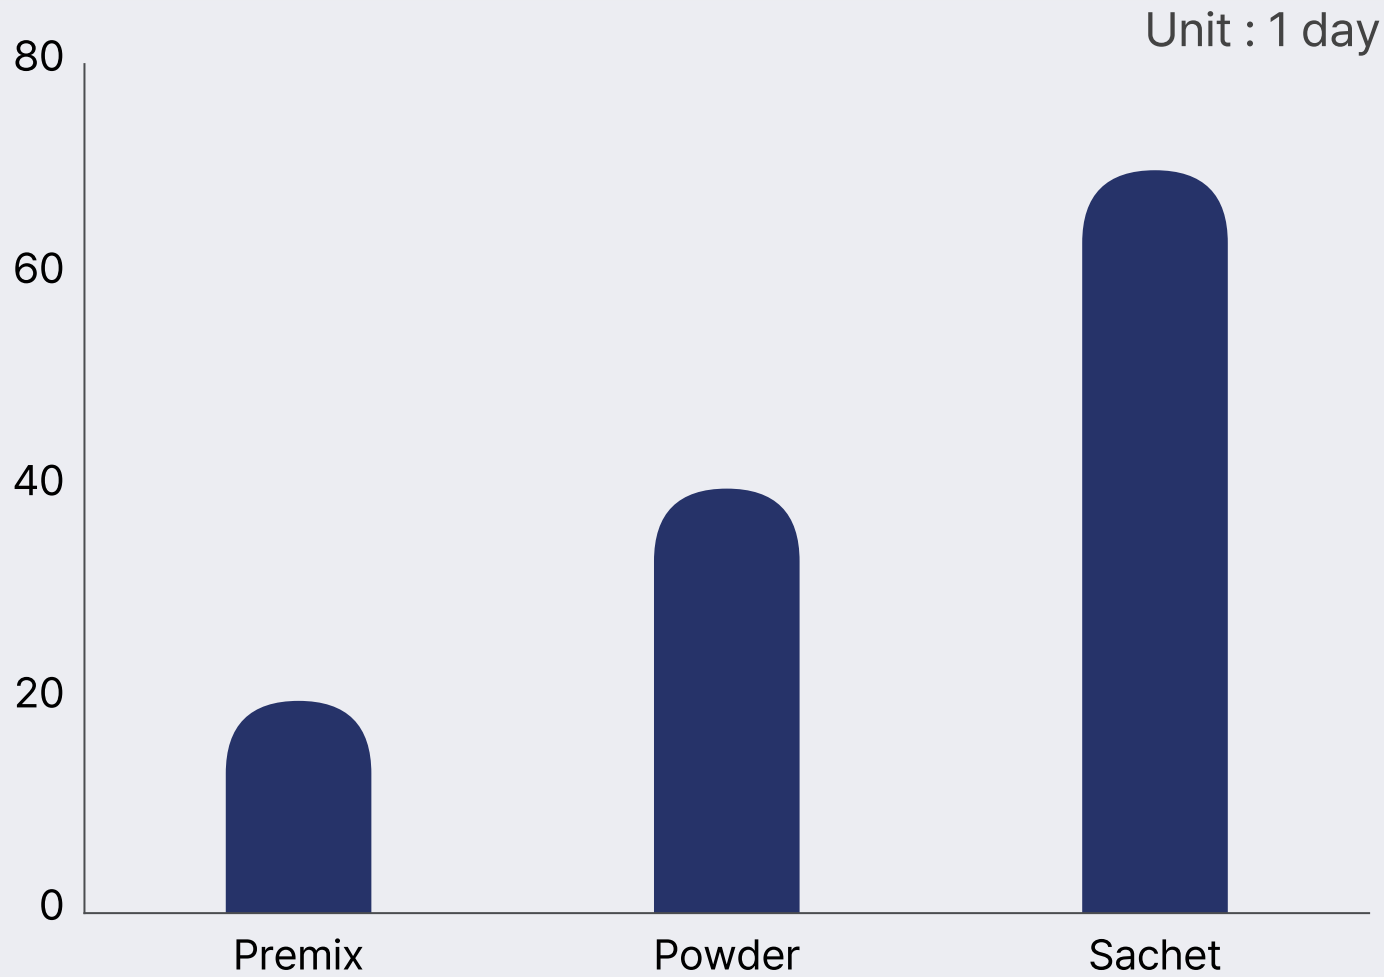

B2B-focused sales network providing customized ingredient solutions
Supporting client growth with market insight and product expertise

Manufacture

In-house blending and premix production at GMP-certified facilities
Precision-driven processes ensuring safety, consistency, and scalability

CAPABILITIES & CERTIFICATIONS

Scientifically validated functional materials are driving the era of Healthcare 3.0 — extending healthy human lifespans through proprietary innovation, global licensing, and certified quality systems that ensure safe, consistent, and reliable ingredient management.

PRODUCTION CAPABILITIES

Purpose built facility for mixing and supplying key ingredients in dry blending form.

We strategically import our starting materials from both domestic and international markets to provide the most comprehensive and high-quality offerings possible.

CERTIFICATIONS

CERTIFICATIONS (Coming soon)

INGREDIENTS

INGREDIENTS

Functional materials developed through scientifically validated research are driving the era of Healthcare 3.0 — extending healthy human lifespans through secured intellectual property and global licensing strategies.

CUSTOMIZED SOLUTIONS

PSL provides tailored sales consulting based on deep scientific insight and strategic market planning, offering optimized solutions for functional ingredients and health product innovation.

Product planning and strategy proposal

01 Academic Understanding

Scientific analysis of functional ingredients and their health benefits, grounded in evidence-based research.

02 Marketability Analysis

Evaluation of product potential based on consumer demand, competitive landscape, and commercial feasibility.

03 Trend Monitoring

Ongoing observation of global market trends and consumer behavior to identify new opportunities and directions.

SITE STATUS

Strategically located in Gimhae, South Korea, our facility offers seamless access to major trade routes, enabling efficient export to Asia, the US, and Europe through nearby ports and airports.

Location	Gimhae, South Korea
Completion Date	August 2024
Facility Scale	1,000m ²
Warehouse	300 m ² capacity with temperature control
Product Types	Nutritional ingredients, functional raw materials, premix solutions
Expected Impact	Enhanced global logistics efficiency and optimized supply chain response
